Mission Statement & Logic Model

The mission of Together We Can is to provide 4th through 8th graders a positive outlook on laws and authorities while providing a sanctuary away from violence, drugs, and gangs in Glendale, AZ.

Social Problem: The social issue addressed by this program is helping under-resourced youth in lower income communities who are at risk of violence, drugs, and gangs.

Needs Assessment

- GESD receives Title 1 funds

Program Evaluation

Quantitative - Outcome Evaluation

Research Question

Will the participation of 4th through 8th in Together We Can reduce the referrals to Maricopa County Juvenile Court?

Outcome Measure (Dependent Variable) and level of measurement

- Our dependent variable is the number of referrals to the MCJC among participants compared to non-participants.

Hypothesis

- Kids attending Together We Can will see a significant drop in referrals to MCJC compared to non-participating kids.

Overall Design

- The overall design is a match control group quasi experiment. A group of kids in a particular demographic will participate in the program and they will be compared to a non-participating group of the same demographic.

Analysis Techniques

- Data acquired will be analyzed using a T-Test to determine if the program’s results are significant.
